Which items and discounts are resulting in a loss of profit?

Median Profit Margin over SubCategories

Sized by Quantity, Colored by Subcategory

Average profit of a sale compared to discount of the item

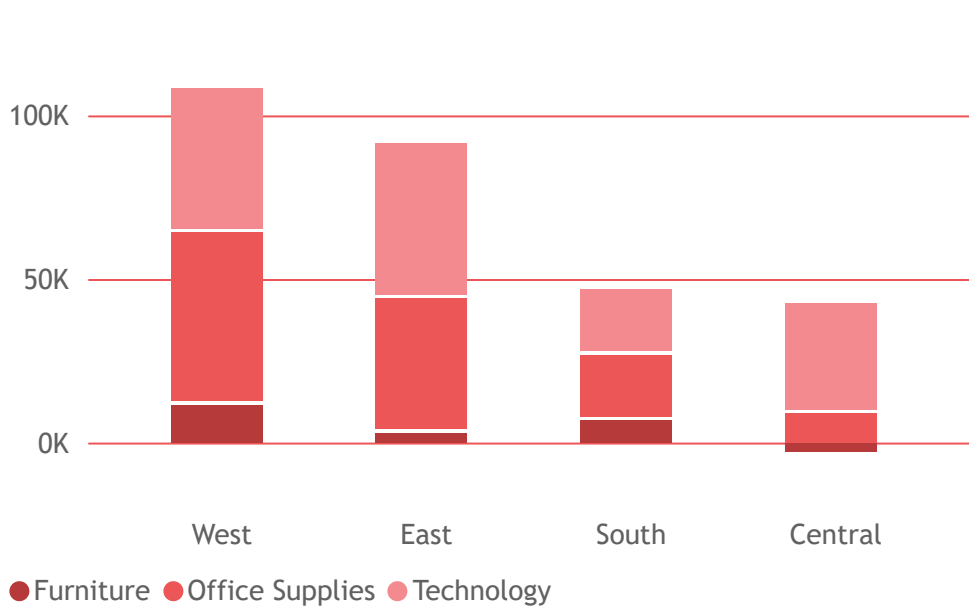

Discounts of 30% on average result in selling at a loss, while the ideal discount range seems to be between 0-10%.

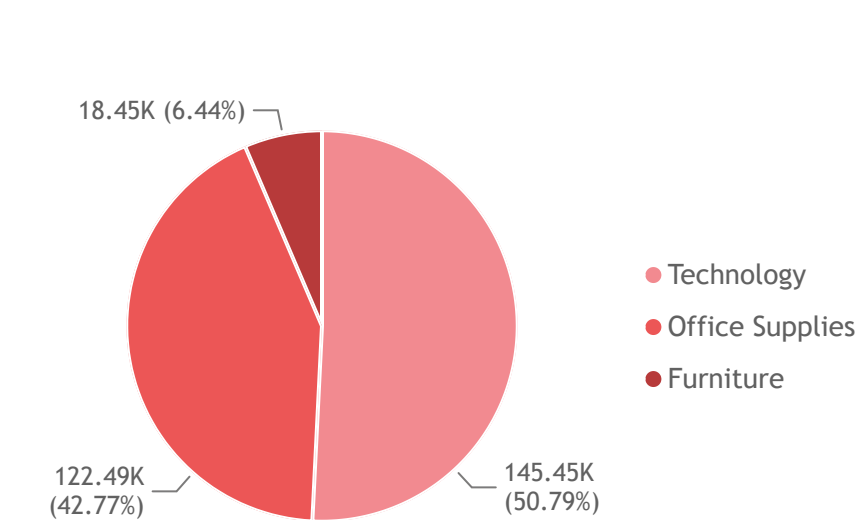

Bookcases and Tables appear to be the biggest contributors to the company selling at a loss.

Different categories also have differences in profits

0.18

The furniture category both has the lowest total profit by far, and the lowest median profit margin per sale, with many sales being at a loss. Items from this category should be evaluated

Binders, Machines, Supplies and Tables are the subcategories of products losing the company the most profit.
